Sample One-Page Abstract for the Book of Abstracts of the Modelica Conference 2009

Francesco Casella Alberto Leva
Dipartimento di Elettronica e Informazione, Politecnico di Milano
Piazza Leonardo da Vinci 32, 20133 Milano, Italy
{casella,leva}@elet.polimi.it

This document is an example of one-page abstract for the book of abstracts of the Modelica Conference 2009. The full conference proceedings will be only published electronically on a memory stick and on the Web. However, for the conference attendant's convenience, a smaller book of abstracts will be printed and made available in the conference kit given to all participants.

The goal of the book of abstracts is to provide the audience with some more information about the papers being presented, so they can choose which presentations to attend during parallel sessions. To this end, you can of course re-use the abstract provided when submitting the paper on the conference management system. However, consider that this page will be a sort of advertisement for your presentation, which will be read during coffe-breaks to decide if your presentation is worth listening to. Therefore, you can try to make it more attractive and informative. For this purpose, you can also include figures, such as Fig. 1, and a few optional references, such as [1] or [2].

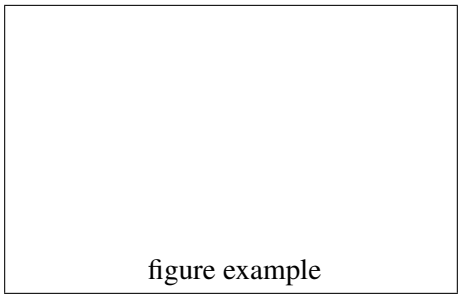

Figure 1: Structure of the DNA double helix

The one-page abstract should be written in English and prepared as a one-page, A4 PDF file (size 210×297 mm) using the Times font, 18 pt for the title, 13 pt for the authors' names and affiliations, and 11 pt for the text. The left and right margins should be 3.5 cm, the top margin 3 cm and the bottom margin 2 cm. Please do not exceed these limits, or your PDF file will not be accepted. The page will then be scaled down slightly for printing. We advise you to use the LaTeXand MS Word templates provided on the conference website in order to ensure the correct formatting.

Please also note that this abstract must be uploaded on the conference management system no later than July 13, 2009, and that at least one author should have registered by that time, for the final paper to be included in the conference programme and proceedings.
